

# WM SUPERLIGHT

REMOVABLE, LIGHT-WEIGHT AND PRACTICAL LOADING RAMP WITH ANODISED ALUMINIUM ANTI-SLIP PLATFORM.

LOAD CAPACITY: UP TO 250 KG

Anti-slip aluminium platform with relief pattern

Safety edges (6 cm)

Gas strut for easy handling

Quick release and coupling.

**DEPLOYMENT:** The WM Superlight is extremely lightweight, using both spring and gas strut assistance. An external swivel kit is supplied on request, making it possible to gain access to the van like a second door.

**REMOVABILITY AND TRANSPORT:** Quick release handles allow for easy removal of the ramp, leaving the load area unobstructed. The keyhole locating plates allow for easy and quick transfer between vehicles.

## OPTIONAL EXTRAS

### FIXED INSTALLATION

A fixed base can be mounted to the ramp on request. This means the ramp becomes fixed and can no longer be removed from the van. This solution simplifies and streamlines installation operations.

### EXTERNAL SWIVELLING

Swivel kit that makes it possible to rotate the ramp through 90° toward the exterior of the van. This system makes it possible to gain access to the van's cargo area without using the ramp (e.g. for loading pallets with a forklift truck).
