

The access ramp for steps is a small lean-on ramp that allows to easily overcome steps up to 15cm.

Finds applications in houses, churches, offices, shops and public and private buildings. **The ramps is self-adjustable and portable.**

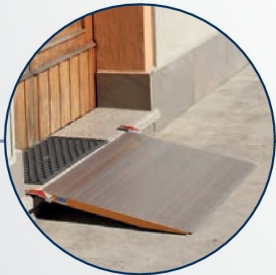

To satisfy any need, the ramp is equipped with **two different positioning systems**.

The first system consists in mounting the lateral brackets that lean on top of the gradient that can eventually be fixed with two supplied bolts using the predisposed holes.

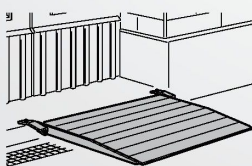

The second system foresees the fixation of the special supplied feet that lean on the ground and that can also be fixed.

## CHARACTERISTICS:

- Completely realized in aluminium
- Standard width: 90 cm
- Standard length: 50 and 65 cm
- Capacity: 500 kg/m<sup>2</sup>
- Weight: 9 and 11 kg
- 2 different adjustable positioning systems

1°-POSITION WITH BRACKETS

2°-POSITION WITH FEET
